ANC 3C RESOLUTION NO. 2008-017

**Resolution Urging Study of a Parking Deck in Connection with Renovation
of Engine 28 Fire Station on Connecticut Avenue, N.W. in ANC3C**

WHEREAS ANC3C desires to bring attention to community needs and opportunities to address these (and has been doing so since 1911); and

WHEREAS the fire station located along Connecticut Avenue NW in ANC3C has many failings owing to deferred maintenance; and

WHEREAS the first station also lacks adequate parking for the First Responders stationed there as its lot has very little open area and is unable to expand; and

WHEREAS the station is located within the Cleveland Park historic district; and

WHEREAS there is an area located to the rear of the station that is about one story above the grade of the station's ground floor that abuts a public alley of a depth corresponding to the length of most passenger cars; and

WHEREAS the station is slated for long overdue and essential refurbishment; and

WHEREAS the First Responders cannot park their vehicles on area streets weekdays and weekday evenings as that conflicts with zones where Residential Permit Parking restrictions apply; and

WHEREAS a structural deck that could support automobiles of these First Responders, if found feasible by the Chief and those reporting to him on such matters and if approved by the Historic Preservation Board in concept, could greatly reduce or resolve the lack of parking for these First Responders; and

WHEREAS such a structure would be well behind any facade visible from Connecticut Avenue and would also cover an unattractive "pit" and would not appear to adversely impact the contributing elements of this building station to the historic district of which it is a part:

THEREFORE BE IT RESOLVED THAT ANC3C requests the Fire Chief, those in his facilities management program, and others to evaluate the prospect of including such a parking deck in the renovation and rehabilitation that is to be undertaken in the near future.
